

REMARKS

Reconsideration of the subject application as amended herein is respectfully requested.

The specification has been amended to correct the noted informality. It is respectfully submitted that the reflective cone of the specification corresponds to the reflector of claim 31 and accordingly no new drawings are required.

The claims have been rejected as being anticipated by U.S. Patent no. 6,452,217. The applicant respectfully traverses this rejection. All the pending claim recites a UV emitter as a radiation source. No such source is disclosed by the reference.

Accordingly it is respectfully submitted that the subject application is now in condition for allowance.

Respectfully submitted,
